

N3

$$P_{\text{out}} = P(\oplus | \kappa \delta) = P(\oplus | \delta) = 0,01 \quad P(\delta) = 10^{-5}$$

$$P(\delta | \oplus) = \frac{P(\oplus | \delta) P(\delta)}{P(\oplus)}$$

$$P(\oplus) = P(\oplus | \delta) P(\delta) + P(\oplus | \kappa \delta) P(\kappa \delta)$$

$$P(\kappa \delta) = 1 - P(\delta) = 1 - 10^{-5}$$

$$P(\oplus | \delta) = 1 - P(\oplus | \kappa \delta) = 1 - 0,01 = 0,99$$

$$P(\oplus) = 0,99 \cdot 10^{-5} + 0,01 \cdot (1 - 10^{-5}) = 0,0100098$$

$$P(\delta | \oplus) = \frac{0,99 \cdot 10^{-5}}{0,0100098} = \frac{11}{11122} \approx 0,1\%$$

$$\underline{\underline{\text{Ovbet: } P(\delta | \oplus) \approx 0,1\%}}$$
